

A **traditional** asset allocation solution

Fund information as of March 31, 2024

The Portfolio Navigator funds offer a range of five traditional asset allocation funds available exclusively with *RiverSource*® variable annuities and *RiverSource* variable universal life products.

The funds are composed of a broad range of underlying funds, designed to provide you with a sophisticated, yet straightforward way to invest. With options ranging from conservative to aggressive, you can choose the fund, or combination of funds, that works best for you.

Asset Allocation*

Allocations are as of March 31, 2024; may not add up to 100% due to rounding.

The Portfolio Navigator funds use a sophisticated investment process:

Strategic portfolio construction

Diversified across asset classes and investment styles, the funds provide exposure to a broad range of investment managers.

Rigorous fund selection

Investment managers conduct indepth analysis to identify quality fund managers and continually monitor fund performance and risk levels.

In-depth securities analysis

A sophisticated technique to measure the underlying securities held in the funds results in well-balanced, efficient and diversified portfolios.

There is no guarantee that a diversified portfolio will enhance overall returns or outperform a non-diversified portfolio. Neither asset allocation nor diversification ensures a profit or guarantees against loss.

Variable annuities are long-term investment vehicles designed to help you through each stage of your retirement — from accumulation to providing income to passing wealth on to your heirs. Variable universal life insurance is permanent life insurance that offers protection and an opportunity to build cash values. With these products, you will incur mortality and expense fees and subaccount expenses and you may also incur optional rider expenses, surrender charges, and contract/policy charges. Both RiverSource® variable annuities and variable universal life offer a broad range of carefully selected investment choices, plus fixed account options.

The pie charts shown identify the asset types and allocations for each fund. Each underlying fund has some exposure to multiple asset types. For example, most equity funds hold a small amount of cash.

VARIABLE ANNUITIES/VARIABLE INSURANCE

ARE NOT A DEPOSIT . NOT FDIC INSURED . NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY . NOT BANK, CREDIT UNION OR SAVINGS & LOAN GUARANTEED · MAY LOSE VALUE

You should consider the investment objectives, risks, charges and expenses of the variable annuity or variable life insurance and their underlying investment options carefully before investing. For a free copy of the annuity or life insurance prospectus and underlying investment's prospectus, which contains this and other information about variable annuities, life insurance or underlying investment options, call 1-800-333-3437. Read the prospectus carefully before you invest.

Before you purchase a life insurance policy or annuity contract, be sure to ask your financial advisor to explain the features, benefits, risks and fees, and whether the product is appropriate for you based upon your financial situation and objectives. Variable annuities and variable life insurance are insurance products that are complex, long-term investment vehicles that are subject to market risk, including the potential loss of principal invested. Withdrawals from an annuity prior to age 59½ are subject to a 10% IRS tax penalty.

Money Market

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. Interest rate increases can cause the price of money market securities to decrease. An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor or its affiliates have no legal obligation to provide financial support to the fund, and you should not expect that they or any person will provide financial support to the fund at any time. The net asset values of money market fund shares can fall, and in infrequent cases in the past have fallen, below \$1.00 per share, potentially causing shareholders who redeem their shares at such net asset values to lose money from their original investment.

About asset classes

In general, equity securities tend to have greater price volatility than debt securities. The market value of securities may fall, fail to rise, or fluctuate, sometimes rapidly and unpredictably. There are risks associated with fixed income investments, including credit risk, interest rate risk, and prepayment and extension risk. In general, bond prices rise when interest rates fall and vice versa. This effect is more pronounced for longer-term securities. Investments in foreign securities involve certain risks not associated with investments in U.S. companies, due to political, regulatory, economic, social and other conditions or events occurring in the country, as well as fluctuations in currency and the risks associated with less developed custody and settlement practices. See each fund's prospectus for specific risks associated with the fund.
